Panrucker's Store - Mirror

DUCK SEASON OPENS SEPT. 15

The season for the hunting of ducks and geese will open on Monday, September 15th, and continue to December 14th. There appears to be a goodly supply of game in the district, and local hunters will be out to take their toll early next Monday morning.

The season for prairie chickens, partridge, etc., opens on October 1st, and is for that month only. Hungarian partridge can be shot south of the Battle River from September 15th to November 14th, but there is no open season north of the Battle River for this game bird.

The bag limit on ducks is 30 per day, 500 the season, and on geese 15 per day, 500 the season. The bag limit on prairie chickens, etc., is 10 per day, 50 the season.

New Rector For Mirror

Word has been received from Bishop Pinkham, at Calgary, that Rev. G. Moore Morgan has been appointed rector of St. Monica's Church, Mirror, and will hold his first service here on Sunday, Sept. 14th, at three o'clock. Mr. Morgan will also have charge of the Anglican churches at Alix, Bashaw and Clive and will conduct the services at these points.

Mr. Morgan was formerly rector at Stettler and Red Deer and came to Mirror from his appointment at Gleichen.

Village Business

The regular monthly meeting of the village council was held in the secretary's office on Tuesday, September 9th, 1924, at 8 o'clock in the evening. All members present.

The minutes of the meeting of August 5th, were read, approved and adopted upon motion of Messrs. Singthors and Thomas.

The following accounts were presented: Postmaster, box rent, \$ 5.00 Ray, A. J., 10.00 Hopkins, A. R., 0.75 Spice & Son, 1.95 Oldring, H., 4.00 Gonter, H. J., 10.00

Irwin-Smathers: That accounts as presented be paid.

Thomas—Smathers: That banking resolution as required by Royal Bank be passed.

Irwin—Thomas: That A. R. Hopkins fix Lake Street road east of English Church.

Smathers—Irwin: That A. Jewell be employed to do repairs on sidewalks.

Meeting adjourned.

Bad Fire Scare

The home of Mr. and Mrs. Fred Dowswell, George district, had a narrow escape from fire last Friday evening, and that it is standing today, is entirely due to the strenuous efforts and hard fighting of Mrs. Dowswell and son, Willie. Mr. Dowswell was away from home at the time and Mrs. Dowswell and Billy had been doing the milking at the barn, but upon their return to the house, found it on fire and full of smoke.

They worked desperately to put the fire out, and as soon as it was got under control, Billy went for help.

The fire apparently started in the woodbox, which was near the stove and had started to spread when they arrived at the house. There was a terrific windblowing at the time and it is fortunate they were able to extinguish the blaze before it gained too much headway.

The regular meeting of Lamerton Municipal council will be held at Alix on Saturday, Sept. 13th.

MISS STRATTON, of the Ridenau Millinery, High River, will be at the Imperial Hotel, Mirror, on September 14th and 15th with a full showing of new Fall Millinery. Inspection invited.

MOTOR 2800 MILES IN TEN DAYS

Jos. J. O'Neill, of Rochester, N.Y., and Harold R. Sharp, of Kingston, Ont., are visiting with Mr. and Mrs. Frank Morrison. Their trip from Kingston to the west, was made by automobile, a Dodge Sedan.

Since coming to Mirror and noting an item in the Edmonton Journal to the effect that a Chrysler Six roadster was driven from that city to Detroit, Mich., in eight days, and they believe they also established a record.

Under the best of weather conditions, the trip from Kingston, Ont., to Lethbridge, Alta., was completed in ten days driving, the speedometer registering practically 2800 miles, which included a few extra miles around cities they passed through on their trip.

After leaving Ontario at Sarnia and entering Port Huron, Mich., the road was through United States, via Chicago and the Yellowstone trail to Billings, Mont., and thence north to Lethbridge, crossing the border again at Sweet Grass.

They speak in highest terms of the Automobile Club's instructions by which they experienced very little trouble in following the different trails.

A Great Menace To Land

Along with field crops and garden crops of market value, Alberta is ripening just now the usual varied and luxuriant crop of noxious weeds, and general destructive operations are strictly in order before the seeds begin to scatter.

But among these vegetable nuisances there is one that requires particular attention. It is the "sow thistle" more over than it has yet received or seems likely to receive. It is a horticultural immigrant. It came here from Manitoba, or other infested parts of the continent, probably in bales of imported hay. The local conditions seem admirably suited to its needs. It has taken root liberally and metaphorically, and is now a greater menace than all other weeds native and imported. It is to be found growing in city gardens, along the streets and roadways, on farms and occasionally on wild lands.

Where a seed of the sow thistle is dropped, there it grows, regardless of the kind of soil. The plant produces seeds that are carried by the winds to great distances. It also grows new plants from the roots. Its eradication is thus a matter of extreme difficulty. Merely cutting it year after year accomplishes nothing, for a new crop springs up from the roots. The roots drive deeply into the soil and cannot be got rid of by plowing, unless it be a long continued course of intensive cultivation. In fact how to get rid of the weed is as yet an unsolved problem, save by methods too costly to be practicable. Where the sow thistle grows, other crops cannot grow. It tends to occupy the soil completely, as well as to spread. It is even claimed that it seems to poison the land and thus prevent other plants growing. In any event, if allowed to develop it so thoroughly takes possession of the soil in a few years that there is no room for other plants. The thistle is useless for fodder or any other known purpose.

As to the results of neglect, in Manitoba, the Dakotas and Montana, there are large tracts in which once productive land has been made absolutely valueless, because it would cost more to get rid of the thistle than the cleaned land would be worth. It is literally true that where sow thistles move on to a farm one of two things happen. The farmer kills it out-right, or eventually he moves off. Alberta has a more productive soil than the long-cropped areas from which the nuisances were imported, and where it has played such havoc. It gives opportunity the weed will

thrive here even more luxuriantly and destructively than if it did there. It has already established seed patches from which the whole of central Alberta can be infected in five years. Unless it is checked in ten years the history of the abandoned farms in Manitoba and the neighboring states will be repeated in this district.

The seriousness of that ought to get house to all parties concerned and this is a case in which everyone who has a permanent stake—direct or indirect—in the success of agriculture in this part of the West is involved. An increasing crop of sow thistle means, a smaller crop of wheat and other grains, fewer jobs and outlets for the cities and towns. As yet nothing like a definite and aggressive campaign for the eradication of this pest has been attempted. It is high time for action in this direction. We will not do to hope that it will be kept down by the methods employed to fight noxious weeds generally. The sow thistle will persist and spread under

that kind of treatment. It will have to be singled out for particular and unceasing attention. If the fight is to be successful there will have to be co-operative action by the municipalities, urban and rural, by the Provincial Department of Agriculture, and by the individual farmer and the townsman who cultivates a garden. Nothing less than that can save this section of Alberta from the fate that has overtaken parts of the continent where the seed came. And the time that action is right now.—Edmonton Bulletin.

Mr. and Mrs. E. E. Estell and Miss Neese spent Sunday at Fox with Mrs. Estell's mother, Mrs. F. E. Hoffman.

The new election act for Alberta passed at last session, has been proclaimed, and the first election to be held under the new act will be that in the city of Edmonton to fill the vacancy created by the resignation of Hon. J. R. Boyle who was elevated to the bench. The transferable vote ballot will be used.

Safety First

The invention of the automobile and the rapidity with which it has come into general use has worked a revolution in the lives and habits of people comparable only to that brought about by the introduction of the steam locomotive. The steam railway made possible the enormous expansion and development which marked the nineteenth century. It spanned the continents, brought isolated settlements into touch with centres of population, opened vast areas to agriculture, and made possible our highly developed industries by providing the means of transportation of their products to far distant markets. It broke down the provincialism in which so many people lived through making travel possible, thereby dispelling much of the ignorance and suspicion of other people and countries which prevailed.

The automobile is now further developing and extending these benefits to mankind. To a greater extent possibly than even the railway, the motor car is bringing city and country parts into closer touch and understanding. The average farmer of today is not isolated as was the case twenty years ago. A day's journey to town by a horse-drawn vehicle is now a matter of only two or three hours, with all that this means in service of all kinds to the rural home.

And the city man and his family, who formerly spent their vacations going by rail to other cities, are now in an increasing extent every year making use of their motor cars to tour the country. Week-ends in the country are a popular pastime, and picnic parties away from the city for twenty, fifty, one hundred miles to beauty spots in the country are of daily occurrence. The motor car thus reaps the advantages of the city, and the city is enabled to enjoy and appreciate the country.

The farmer has long suffered inconvenience and loss through lack of good roads. Even he did not fully appreciate just how great was the loss thereby sustained in the handling of his products to market, but he has now more frequently been opposed by the necessity to the construction of good roads and bridges. To an even greater extent, the city dweller was averse to increasing taxation for the purpose of rural road building. The automobile has changed all this, and today both city dweller and farmer are clamouring for the building of good roads. Hundreds of millions of dollars are being spent upon roads and the farmers are reaping the benefit in reduced costs in handling their products to market.

Thus are the habits of people changing, and radical improvements being wrought in the economic life of the country. The automobile has, of course, also created new problems. Congestion of traffic in centres of population, the increasing noise disturbances now done by automobiles, the more populous cities, congestion in the downtown areas, and the "speed demons" who sacrifice everything to their own desires and selfishness.

Admitting there are fewer accidents than would be the case if the same number of horse-drawn vehicles were used, the number of accidents is far greater than it should be or there is any necessity for. Hence the importance of the Safety First campaign now being organized in different parts of the country, such as the one in Westchester County, N.Y. On June 1, 1921, the 11 communities in the county jointly started a Safety Week campaign—a short, intensive drive to impress on all residents and tourists alike, with the necessity of exercising care. During the week in this county, 146,000 people and through which 260,000 motor-driven vehicles pass every day and from New York City, there was only one death and six serious injuries, as compared with an average of 18 persons killed each month during the preceding four months, not to mention hundreds seriously injured.

What is being accomplished in Westchester County can be repeated all over the country if sufficiently energetic steps are taken to impress on everybody the absolute necessity of the greatest care being exercised in view of the changed conditions which the almost universal use of the motor car has brought into our present-day civilization, and the inflicting of drastic punishment on those who persist in disregarding all laws and the rights of others.

It is not too much to say that the motor car has brought into our present-day civilization, and the inflicting of drastic punishment on those who persist in disregarding all laws and the rights of others.

His Chinese Trade

He Asks To Be Used By Government

To Demonstrate Possibilities Of Northern Latitudes

An area of approximately ten acres of crown land situated either Mile 127 or Mile 185 on the Hudson's Bay Railway, is to be placed under cultivation as a demonstration project.

The Federal Department of Agriculture, stated Hon. W. R. Mather, Minister of Agriculture, on his return trip after an inspection of the railway.

The object will be to demonstrate the growth and maturity of all garden vegetables, grains and grasses, which may prove commercially practicable.

Result produces four-fifths of the coffee consumed by the world.

Will Urge Completion Of Hudson Bay Road

Hon. W. R. Matherwell Finds Reports Making Road a Urge

The four great natural resources of the north country—minerals, timber, fish and fur—are enough in themselves to warrant immediate completion of the Hudson's Bay Railway, Hon. W. R. Matherwell, Federal Minister of Agriculture, told a large gathering at Leask, Sask., today.

He had just returned from a trip to the end of steel at Mile 232, Kettle Rapids.

"After my return from a trip of inspection over the Hudson's Bay Railway as far as the end of steel at Mile 232, Kettle Rapids, will be naturally expected to tell you what my impression is of this vast and very rich country," said Mr. Matherwell. "Let me first say this, without fear of contradiction, the magnitude of our tremendously valuable local industries, minerals, timber, fish and furs, are so vast, sufficient in themselves to warrant the expenditure of the remaining necessary capital investment of approximately \$400,000 to complete the Hudson's Bay Railway to the port of Nelson into immediate operation. I intend to go back and see the fish to the river, and what I have told you here, and you may rest assured I will not knock the other completed and operation of this route."

"This has been my first visit into the country tributary to Hudson's Bay, and my cars have not been closed to the Hudson's Bay Railway, and I will try and put the information so gathered to good use. I am not only surprised, but inspired, by the vigor and resourcefulness of the people in this country, and that alone, I feel certain, is a guarantee of the success of this great undertaking on the part of all of us."

"It is impossible for anyone to go through this extensive country in a private car and see from its windows the great potential wealth contained there, nevertheless, one can see the unlimited possibilities."

"Now, in regard to the readiness of the railway itself, and the criticism of the eastern press, stating that the rails were sunk into sight in the muck, I want to say that such statements are not only incorrect and false, but are willfully untrue."

"This so-called mucking is no more a quagmire, as they would have us believe, but it is simply a top soil which, dried, soon becomes fertile and productive. Of course, the 232 miles of road is not equal to daily operation, but it is a great improvement over the more or less since the contractors left it some six years ago. Any other railway on the continent, under similar conditions, would have suffered the same."

The travelled spot of the line behind a mixed train of 50 cars, going a safe speed of 20 miles an hour, and I am convinced that the Hudson's Bay Railway can be built and kept in the best condition at reasonable expense."

A Liner Without Funnels

Motor-Driven Boat Plying Between Vancouver and Australia

The number of funnels on an ocean liner has been a popular gauge of the grandeur of the vessel, but the Oregani, recently launched on the Pacific, has no funnels. The vessel is fairly called the first motor-driven passenger liner. She has a displacement of twenty-three thousand tons and a speed of eighteen knots. Four sets of six-cylinder Diesel engines deliver thirteen thousand horsepower, which is applied to four screws. The Oregani will ply between Vancouver and Australia, a route long enough to make commencing fuel and fuel space of considerable importance—YOUTH'S Companion.

Princesses in Business

There are now thirty-four English Princesses in England engaged in business, says an English correspondent. Strange to say, while many find it hard to make a living, these exalted dames all seem to prosper, all have money, and some of them speak a dozen words of the English language correctly. One charming Princess, the people say, has been so making a cool £7,000 per annum.

Internally and Externally It Is Good

The crowning property of the Thomas Electric Oil is that it can be used internally for most complaints, and externally for sore throat, croup, whooping cough, pains in the chest, colds and many kindred ailments. It has qualities that are unsurpassed. A bottle of it will save a family as much as always having it at hand.

Calgary, Alberta, is said to have more telephones in proportion to population than any other community on the American continent.

Tattooing the lover's name on the wrist is said to have supplanted the wrist-watch as a fad among English girls.

BROCKVILLE FARMER SUFFERED 20 YEARS

"Les" Booth Finally Got Relief Through Taking Tanlac.

"Since taking Tanlac I feel as if I sometimes seem like a dream for there was hardly a day in 20 years that I did not suffer."

"For 20 years, up to three years ago when I took Tanlac, I suffered from rheumatism in my arms, shoulders, back and hips, so bad at times I could not lift my arms to put my coat on. I couldn't even write my name and I

just limped about like a cripple. Many a night I looked like I would not live to see daybreak and once I was laid up six months unable to hit a lick of work."

"Money could not buy the good Tanlac has done me. It ended every trace of rheumatism and built up my weight 16 pounds, and since then I have not had a rheumatic ache or pain. If anybody wants to know about Tanlac, just let them see Les Booth."

Tanlac is for sale by all good druggists. Accept no substitute. Over 40 million bottles sold.

WATER WORK TO BE PROVIDED FOR UNEMPLOYED

Ottawa.—The unemployment conference called by the Federal Government was concluded with the adoption of a report embodying a number of recommendations for meeting conditions of unemployment throughout Canada. The report, which was drafted by a special committee, recommended that emergency relief should be granted when, after full and careful investigation, it was found to be necessary. The expense of such relief, it stated, should be borne by the Federal, Provincial and Municipal authorities on the basis of fifty per cent by the municipalities and twenty-five per cent, each by the province and the Dominion.

Recommendations of the Federal, Provincial and Municipal Government works now under construction should be continued during the winter months and that all Federal and Provincial Government work provided for during the past session of Parliament and legislatures should be undertaken immediately and continued during the winter, were also contained in the report. It was also recommended that contemplated construction of public buildings by the Federal Government should be proceeded with at once.

The report of the committee met with comparatively little opposition, but an amendment introduced by John W. Bruce, Toronto, one of the Labor delegation, called for regulation of immigration to correspond with available employment, was not approved without considerable discussion. Finally it was adopted by a vote of 12 to 11.

Just before the conference adjourned, H. James Macdonald, Minister of the Interior, promised his best efforts to see that the recommendations in the report were approved by the Government.

Alberta Schools May Need Assistance

Inspector Surveying Districts Where
Crops Have Failed

Edmonton.—School inspectors are now making a survey for the Department of Education in the districts affected by crop failures this year, in order to ascertain what assistance will be necessary to keep the schools in operation. Mr. P. W. Baker, the Minister of Education, says that the Government's policy in this regard will be decided when the inspectors' reports have been made. It is practically certain that the Government will have to make loans or grants to a considerable number of school districts that will not otherwise be able to operate on account of financial conditions, but just to what extent is not yet known. The southeastern part of the province is particularly affected this year, according to Mr. Baker, whereas the special grants last year were mostly in the north, where a good many schools were closed for a week and a half.

Boy Scout Working Way Around World

Native of Denmark, Started Long Journey on April 3

Regina.—Hilmer Stuh, a native of Denmark, and once a resident of Egypt, was in the city recently on his way around the world.

In Finland he made a wage of \$1.60 that he could circulate globe, working his own way and making the money for necessary expenses. The winner is to pay the money into the Boy Scout fund in Denmark.

A start on the long journey was made April 3, and the traveler expects to finish November 15, 1925. He is 24 years old and in his native land Mr. Stuh is a scout master.

Tip To Railroad Prevented Hold-Up

Sheriffs Boarded Golden State Limited and Captured Bandit

Chicago.—A tip to the Chicago, Rock Island and Pacific Railroad officials prevented a hold-up of the Golden State Limited, at Meade, Kan. Deputy sheriffs boarded the train a few miles east of Meade, and fought off three masked men who boarded the train at the latter stop.

In the shooting that followed, two of the deputies were wounded, one of the bandits was captured and the others escaped into the darkness.

Has Given Up Hope
Toronto.—Ontario has given up hope of being able to get Alberta coal in the coming winter.

N. N. U. 1541

Canada's Improved Financial Status Is Subject Of Comment

"The returns as to Canada's trade for the past 12 months," says the Yorkshire Post, the leading commercial paper in the north of England, "clearly show that the Canadian business situation as a whole is gradually improving. Her exports to South Africa and New Zealand have substantially increased, but her sales to Australia have declined about \$2,000,000, while her business with Great Britain might have been better than it has been. Generally speaking, however, the result of Canada's endeavors to trade with the Empire has not been inconsiderable. It is probable that improved financial status of Canada will lead to even better business not only with Great Britain, but with the Empire generally."

British Milling Concern To Operate In West

Spillers Overseas Limited, Now
Actively Engaged In Grain
Milling Business

Calgary.—Spillers Overseas Limited, the British millers' company, has completed negotiations with the Alberta Pacific Grain Company, according to telegraphic information received from Montreal from Sir William Nicholls, head of Spillers' interests.

It is understood that this announcement means the acquisition of Spillers Limited, of the controlling interest in the Alberta Pacific Grain Company. The administration is to remain the same, with John J. McPherson, now head of the Alberta Pacific, as managing director, and the present staff of the company.

This arrangement comes negotiations carried on by Spillers during the last few months in connection with the announced intention to acquire a group of investing \$2,500,000 in Western Canada. The company has already received approval of the Alberta Government, with a capacity of 2,500,000 bushels and at a cost of \$2,500,000. The Alberta Pacific Grain Company owns about 250 elevators, two-thirds of which are situated in this province, and in Saskatchewan, with the exception of one or two in British Columbia.

Labor Government A Future In Britain

So Thinks Malcolm MacDonald, Son of
the British Premier

Montreal.—There are no young Liberals born in Great Britain today. "Things have changed since the days of Gilbert and Sullivan, when every young Briton was either a 'Lib' or a 'Con'." The habits of the future are destined to be either Conservatives or Laborites. This is the assertion of Malcolm MacDonald, son of Ramsay MacDonald, Prime Minister of Great Britain, interviewed in Montreal.

The present Liberalism is the beginning of a long labor rule," Mr. MacDonald says. "Labor will do very well in the next election, but I don't think they will get a clear majority."

It will be a tussle between the Conservatives and Laborites." The Liberals would not figure much, and he does not believe that Lloyd George will ever return to power.

The star in the Conservative firmament would be Winston Churchill whom Mr. MacDonald believes will one day be Conservative leader.

Mr. MacDonald is in Canada as a member of the Oxford University debating team, which will engage in oratorical contests in Canada and United States.

Veteran Horseman Dead

Wheeling, W. Va.—Edward F. "Top" Green, of Memphis, Tenn., died of heart failure at his home in Wheeling, where he had lived for many years as the "grand old man of the trotting ring," died in the harness. The veteran horseman was fatally injured when his mare, Milledy Guy, stumbled and fell during the first harness race at the West Virginia State Fair.

Shall Be Laureate's Bell

By Church Bells Told The bell of the steamship Laureate, which was wrecked near Lough Sulvy in 1917, has been salvaged and presented to the parish church here, where has been dedicated it for use.

Cannot Sell Alcoholic Extracts

Edmonton.—In the entire province of Alberta, including cities and towns, as well as the Indian country, the sale of alcoholic extracts and essences by any merchant or agent will henceforth be illegal.

Son of Britain's Premier

MALCOLM MACDONALD
son of the British Premier, who is a member of the British university debating team which will compete against Canadian and United States university debates.

VARYING YIELDS ARE INDICATED IN CROP REPORTS

Ottawa.—Reports of crop conditions in the prairie provinces on August 31, compiled by the Bureau of Statistics, indicate greatly varying wheat yields in different territories. From Manitoba, cutting of wheat is reported as complete, and threshing general. "Good" yields are better than for several years, some fields of Manitoba wheat yielding 40 bushels. It is reported that the Manitoba Department of Agriculture reports wheat two-fifths cut in Southern Manitoba on September 1, and cutting just beginning in the north. "By and large cutting well advanced; frost damage small, and hail loss slight; run damage negligible in Manitoba, but some loss in places." Brandon reports estimate the yield at 18 bushels.

Reports from Saskatchewan on August 25 are encouraging. The best crops are in the southern part of the province. It is reported, but marked improvement is apparent in the east, central and northern districts. "Wheat cutting general about the end of the month." From Saskatchewan, current yields are estimated at from 19 to 20 bushels an acre.

Harvesting is proceeding in Alberta under varied conditions. At the end of the month the cutting in the southern section of the province was 15 to 25 per cent complete. In the northern areas crops somewhat, and proved the grain crops somewhat, and warm weather has added the filling process to such an extent that yields in some districts will be larger than anticipated.

Notwithstanding the late rains, however, there is a very large area in the southern districts where the yield will be very light. It is reported much of the grain in these sections will be cut with headers. This process is now going on, being hampered in some sections by heavy growth of weeds, which developed as a result of the late rains. The experimental farm at Lethbridge reports that the general rains in August greatly improved the feed situation at the end of July. Yield of late sown coarse grains will be materially improved, but the effect on wheat, beyond better filling, will not be much.

SCOTTISH GIRLS FOR DOMESTIC SERVICE

The Women's Branch of the Colonization Department of the Canadian Pacific Railway, Glasgow, is rapidly creating a reputation in Scotland for attracting the most efficient and experienced cook-generalists for domestic service in Canada. The number of inquiries for such girls have been sent home to their parents about Canada is the best possible tribute to the Women's Branch and also to the splendid conditions afforded servant girls in Canada today.

As a rule, the Scottish domestic doubles her wage by going to Canada, this is an important factor in attracting the right type of girl. No better proof is afforded than this photograph which shows not only the excellent physique but the personal charm of these good Scotch lassies who, like their forefathers, have done so much to make our wonderful Canada of today.

Allied Powers to Protect Foreigners In China

Washington.—Word of action by representatives of the United States, Great Britain and France, for assuring protection of Chinese lives and property in the civil war zone about Shanghai, was received from American Charge d'Affaires, Bell. They have asked that a declaration of neutrality be issued covering the whole Yangtze River and its mouth. American citizens in the war zone are not in immediate danger, according to Consul-General Cunningham, Bell. Because of the Chinese foreign minister at Peking that the whole Yangtze River from Wosung is practically one vast harbor, containing ships of every nationality, and that a naval battle in the greatest harbor in the East could not be tolerated.

Interview Premier Dunning

Modernists of Saskatchewan
Present View On Liquor Laws
Regina, Sask.—Answering a delegation from the Moderation League at Saskatchewan, which waited on Premier Dunning and members of his cabinet and which presented the league's desire in the way of liquor control, the Premier said: "Do not believe any rumors you may hear as to legislation under consideration." The first statement will be made from the floor of the house. The league's formal statement declared that body to be in favor of.

The establishment of Government stores, or agencies, in the cities, towns and villages of the province for the sale of spirituous and malt liquors has been proposed. The retail sale of beer to be consumed in licensed premises. That in cases of infractions of the act the penalties be severe and include the cancellation of the license of the premises for a period commensurate with the offence.

Absorbs Subsidiaries

Saskatchewan Co-operative Elevator
Co. Becomes Largest Grain Handling Firm In World

Regina.—The amalgamation of all subsidiary companies of the Saskatchewan Co-operative Elevator Company under the name of the parent organization is announced here.

Up to now the Saskatchewan Co-operative Elevator Company, Ltd., Stewart Grain Corporation of New York and the James Stewart Grain Company, Ltd., Winnipeg, were operated as separate units. Under the re-organization scheme these will be operated as departments of the parent firm.

The change brings the central control of the largest self-contained grain handling firm in the world to Regina. The departments of the company are now operated at Regina, Winnipeg, and several other points. However, all administered from the head office in this city.

Ontario Prohibition Issue

Toronto, Ont.—The prohibition issue with the Government of Ontario on October 23. On that date the electors of this province will express their opinions on questions relating to the Government's attitude on the continuance of the Ontario Temperance Act or some other form of legislation relative to the sale of intoxicants.

Political observers look for one of the most strenuously conducted publicistic elections in the history of this part of Canada.

Collect Customs Duty At St. Paul Yards

New Arrangement With U.S. Import
To Cattle Shippers

Winnipeg.—In future customs duty on cattle exported from Canada to the United States via Winnipeg will be collected at South St. Paul stock yards, and not at Emerson as heretofore. This very important announcement was made by O. Freer and W. J. Macdonald, of the Winnipeg Live Stock Exchange, on their return from St. Paul, where they were in conference with United States' customs officials, because of animal industry representatives and local stock ranch men who have been in communication with Washington on the subject.

Mr. Macdonald, President of the Winnipeg stock and feeder show, hailed this arrangement as being of the greatest value to Western Canadian farmers, as it will mean, he stated, the reception in the States from Canada of cattle of a much more perfect physique than at present under the old regulations.

Home Bank Claims

Conference of Depositors to Be Held
in Toronto on Oct. 1st

Toronto.—L. E. Wilson, joint liquidator with G. T. Calkins, of the F. A. Egan and Sons Bank, is expected to be in the city on October 1st. It was also learned that no member of the Winnipeg Grain Exchange or anyone indirectly connected with the exchange, is being considered at the present time for the position.

Most of the time of the committee was spent in the other part of the handling of pool wheat through regular line elevators. "That is a problem big enough for one committee to decide at the time of year," one member of the committee stated.

Says Ghandi Now Recognizes His Error

Considers To Be Friend Of British Rule In India

Vancouver, B.C.—No sane government at home would consider giving India Home Rule in view of the ignorance of the people and the manner in which the politicians work upon them. F. A. Egan and Sons, the Public Works Department, Central Province, India, who reached Vancouver on the Empress of India.

The habit of local governments of advancing destructive politics and of the Indian Congress in the past, has been practically every occasion for the Indian Congress in the past, and the feeling of insecurity everywhere in India. Mr. Egan, who was once a member of the Indian Congress, is now enough to see the error of their former policy. Mr. Egan said further, and this man, who was once a dangerous radical, is now moderate and thought to be a staunch friend of British rule in India.

Diamond Robbery In Toronto

Merchants Loss Valuable Papers and
\$15,000 Worth of Jewels

Toronto.—About \$15,000 worth of diamonds, valued at \$15,000, were stolen from the office of R. Strauss and Sons, wholesale diamond merchant, in the city. The situation was, apparently, cut off by means of a gold chain, no explosive being used, as is generally the case with such robberies, the thief lying on the floor beside the open door of the safe.

In addition to the diamonds, the firm lost insurance papers and a number of stock certificates. The safe was absolutely empty when found by the caretaker.

Australia Ratifies Wireless Expenditure

Provides For Erection Of Beam
Station Costing \$120,000

Melbourne.—The House of Representatives ratified the bill which provides for the erection of a beam station in Australia to cost \$120,000. The station will operate on a wave length of one hundred meters.

Premier Bruce recently expressed his hope that the transmission rate by beam wireless service would be less than those chargeable under high power system.

Child Spent Night In Bush

Nelson.—Wandering away to Perry Creek, from where its parents were camping, the three-year-old daughter of Mr. and Mrs. D. Keith, of Weyburn, spent a night in the bush in sight of anxious search parties, and was found unharmed in the morning at 8 o'clock on the opposite bank of the creek two or three miles distant from the camp.

No Special Preparation For Prince

Toronto.—The manager of the Prince of Wales's match in Alberta, W. L. Carlyle, was in the city Sept. 2, enroute to the west. No ostentatious preparations were being made for his march, for the Prince's visit to his ranch.

Mirror and the District

Miss Betty Neece, of Hanna, is a visitor at the home of Mr. and Mrs. E. E. Estell.

Mr. and Mrs. John McNair, of Bahaw, are making a short stay at the home of their son, Douglas and Mrs. McNair.

Mr. and Mrs. Robert White left on Monday to spend a couple of months' holiday at Toronto, Ont., and other points in the East.

M. Ebert Howo, Registered Optometrist and OPTICIAN, will make his next regular visit to Mirror, at the Imperial Hotel, on Wed., Sept. 24th. 38

Mr. and Mrs. J. A. Jaynes and three children motored to Mirror from Lloydminster, and are visiting with the former's parents, Mr. and Mrs. E. Jaynes.

Ralph Thwaites returned on Saturday last from a five weeks' visit at the coast.

Hugh J. Smith left on Tuesday to spend a few days with his grandparents, Mr. and Mrs. J. L. Smith, at Calgary.

Miss Gertrude Panrucker is confined to her home, suffering from a mild attack of diphtheria, and the living rooms have been placed under quarantine.

Lois, the young daughter of Mr. and Mrs. J. P. Waters, met with a painful accident last Sunday. She fell from a chair and struck her shoulder against the leg of the table with such force as to fracture the collar bone. Medical attention was given by Dr. MacLennan, and suffering has ceased. It will be necessary to keep the arm in a sling for a time.

SAUCY SNIPS

Vol. 13, No. 23

KNOB HILL

Cash Price: Nil

To the Editor of the Saucy Snips.

DEAR SIR:

I must apologize for my paucity of news this week, but the local editor is away on holiday so I have to scarp up the news myself; some diff. I'll tell the world.

I have made the most I can of the news available, but still am a few lines short of \$2.00 worth, so would suggest repeating one or two items I fill in; the one about the dates for instance. Anyway, PLEASE SEND ME THE \$2 IMMEDIATELY ON RECEIPT OF THIS. I have promised to play golf on Saturday, my stickie have served their time and I must get new ones, and the Sports Goods Store simply refuses me credit (you will recall that item two weeks ago, which the editor foolishly printed, and which I failed to delete in the cuttings I sent you; I bear the brunt.) Indeed the life of a Special Correspondent is a hard one. Send that \$2 WITHOUT FAIL. Joe.

(By Our Special Correspondent) Today, Thursday, is September 11th.

September 10th this year fell on a Wednesday.

The day after to-morrow is Saturday, September 13th.

A calendar month from today will be October 11th, which falls on a Saturday.

The local baseball team are adding to their collection of laurels, they have appointed your friend 'Joe' to the position of official reporter; this in spite of considerable opposition from certain quarters, where it was felt, in the interests of economy, that the community already had a large enough burden to carry in the feeding of the team, and their mascot, the cat; and now the official reporter.

Our readers will hear with interest the statement that September 11th of this year falls on a Thursday. It is hoped by it's many friends in this district that it won't hurt itself.

INDIGNATION MEETING

A public meeting of ratepayers was recently held in the town hall. It was pointed out that no one did actually pay rates, as on a motion by Mrs. Mulligan, seconded by Mr. T. Catup, the meeting was defined as (to quote her verbatim) 'a meeting of rate-ought-to-be-payers-but-don'ts.'

The whole village was present. The press chair was very fully occupied, and grumbled ominously with it's burden.

Mrs. A. Cormack and children are spending a few days this week in Calgary. Mrs. Cormack is planning on leaving some time about the first of October for a lengthy visit with relatives in Scotland.

Mrs. H. H. Croxton was operated upon for appendicitis at the Royal Alexandra hospital, Edmonton, last Friday morning. Mrs. Croxton is gaining strength nicely and is on the road to recovery.

Dr. R. A. McCormack, Dentist, will be at Alia, from Monday noon, Sept. 15th, to Wednesday, Sept. 17th, and at the Imperial hotel, Mirror, from Thursday, Sept. 18th, to Saturday, Sept. 20th, noon. 37

Mr. and Mrs. S. Pocklington, of Stettler, recently returned from spending the past three months in the Old Country and the British Empire exhibition. Mr. Pocklington is supervisor for the S.E.B. and paid this district an official visit Friday.

J. W. Trotter is at present in the Royal Alexandra hospital at Edmonton, where he underwent an operation last Thursday morning for gall stones. The operation was a success, and latest reports are that Mr. Trotter is making good progress toward recovery.

Nearly six weeks ago W. W. Sharp had his left shoulder dislocated when he was thrown from the horse he was riding. Mr. Sharp was rounding up cattle and some of them got across the railroad, and in going over the tracks after them the horse slipped, throwing Mr. Sharp to the ground so that he landed heavily on his left shoulder. He neglected to give the dislocated member needed attention at the time, as Dr. MacLennan was away, and as a result, it was necessary for him to go to Calgary and have the bone re-set. Mr. Sharp returned home last week and the injury is doing nicely.

Millinery

Miss Stratton, of the Hildean Millinery, High River, will be at the Imperial Hotel
